How Accurate are Surveys?

For eliciting truthful answers

- Internet surveys are better than phone surveys
- Phone surveys are which are better than in-person surveys
- People will admit more if they are alone than if others are in the room with them
- However, on sensitive topics, every survey method will elicit substantial misreporting. People have no incentive to tell surveys the truth.

How Can We *Really* Know What People are thinking?

	REPORTED ON SURVEY	OFFICIAL COUNT
Registered to vote	83%	69%
Voted in last presidential election	73%	61%
Voted in last mayoral election	63%	36%
Have a library card	20%	13%
Gave to a recent Community Chest charitable drive	67%	33%
